

INDEX TO *TUNBRIDGE COOKS: 1761 to 2011*

Note: This index contains every name and every recipe in *Tunbridge Cooks*, as well as references to ancillary happenings, places, etc. that are mentioned in the text.

The book is somewhat unconventional in that the pages are not numbered; recipes and family histories are grouped by family surname, and the family names are in alphabetical order. The family names have therefore been used in the index where page numbers would be expected, and appear in **BOLDFACE SMALL CAPITAL LETTERS**.

Some family names appear more frequently than others, and the book's compilers have subdivided these to reduce confusion. Thus there are five different locations for "Howe" in the index (where page numbers would be expected). They are:

Howe: North Tunbridge: Spring Road
Howe: North Tunbridge: Whitney Hill
Howe: South Tunbridge: James K. and Marion Howe Family
Howe: South Tunbridge: Sylvester and Etta Howe Family
Howe: South Tunbridge: Walter and Evie Howe Family

Similarly, there are two subentries for Rogers. Arbitrarily these have been designated "Rogers" and "Rogers (Rose)," reflecting the order in which they appear in the book

Where the text or the context indicates a married woman's maiden name, she has been indexed under both her maiden and married names. The indexer has relied on the text, common sense and (limited) personal knowledge in making these entries. Any misjudgments by the indexer in these cases are solely his responsibility, not that of the Tunbridge Historical Society or the book's compilers.

Some recipes appear in the index more than once: for example, all sauces are grouped under that heading, and each sauce is also listed individually by name (chili, chocolate, egg, etc.). Likewise, casseroles are grouped under that heading, and also appear separately (tuna casserole under *T*, zucchini casserole imperial under *Z* etc.). Entries in major groups, such as cake, cookies and pie, generally appear only in the group entry. Entries outside of major groups are always indexed by the primary ingredient (chicken, pork, peppers, parsnips, peanut brittle, etc.) and in some cases are cross-referenced—peanut brittle is also indexed under candy.

The facsimiles of handwritten pages that follow the recipes are not indexed, nor are the two pages of home remedies interleaved with them, although the 1951 photographs from *The American Magazine* article about Tunbridge are. Those two pages are toward the back of the book and are indexed as "**PHOTO PAGES (FOLLOWING RECIPES)**." Persons named in the cover photograph are also indexed.

This index (but not *Tunbridge Cooks*) is © 2012 Charles H. Ashton, but is freely available for personal, noncommercial use at www.AshtonIndexing.com. Please feel free to share it with your friends, neighbors and, most of all, your family.
